

Lending Club Case Study

Problem Statement : Based on the data provided, identify risky loan applicants to reduce credit loss to the lending company.

Solution Approach

- Identify null values in the dataset
 - Replace / Drop null values from the dataset
 - Remove unwanted columns which are not relevant for the analysis
 - Find Outliers
- 
- A large yellow right-angled triangle is positioned in the bottom right corner of the slide, pointing towards the top right.

Identify Null Values in the dataset

```
] loanData.isna().sum()
```

```
id                0
member_id         0
loan_amnt         0
funded_amnt       0
funded_amnt_inv   0
...
tax_liens         39
tot_hi_cred_lim   39717
total_bal_ex_mort 39717
total_bc_limit    39717
total_il_high_credit_limit 39717
Length: 111, dtype: int64
```

Identifying Null Values

Drop Null Values from the dataset

```
loanData.dropna(how='all', inplace=True)  
loanData.dropna(axis = 1, how='all', inplace=True)
```

Drop Null Values

A large yellow triangle is positioned in the bottom right corner of the slide, partially overlapping the white box containing the title.

Dropping records which have "loan_status" as current.

```
loanData = loanData.drop(loanData[loanData['loan_status'] == 'Current'].index)  
len(loanData)
```

38577

Drop Current Status records

A large yellow triangle is positioned in the bottom right corner of the slide, partially overlapping the white box containing the title.

Remove unwanted columns which are not relevant for analysis

```
loanData.describe()
```

```

Remove
unwanted
columns not
relevant for
analysis

```
loanData.boxplot(column=['annual_inc'])
```

<Axes: >

Finding outliers

Outcome of
the analysis

A vertical line is positioned to the right of the text. In the bottom right corner of the slide, there is a yellow right-angled triangle pointing towards the top-left.

- People with tenure of 36 months have defaulted more

- People home ownership as “Rent” have defaulted

- People who have an interest rate between 10-20% have defaulted

- People who have been “verified” have defaulted

- People who have been employed for more than 10 yrs. have defaulted
